15 SERIES 23" LED

The 23" StreetLazer® Minibar offers the choice of either TIR Optic or Reflective LED modules. TIR Optics use a lens over the LED to direct light in a more focused beam while Reflective LEDs use a mirrored coating to disperse light at a wider angle to provide greater 360° coverage. This low profile lightbar features an aluminum base and clear, polycarbonate housing with an encapsulated power supply to provide strength, durability, and protection against the environment.

Standard Models - TIR Optic Modules

Features and Benefits

- Low profile, aerodynamic styling
- Coated aluminum base and polycarbonate lens, weather-proof housing with encapsulated power supply
- Choice of two user-selectable flash patterns (quad flash) 360° Flash: All modules illuminate simultaneously
Sweep Flash: Left and right modules illuminate alternately or in pairs, dependent on configuration
- Temperature Range: -22°F to +122°F (-30°C to +50°C)
- Warranty: Lightbar = 2 Years / Electronic components = 5 Years
